Simple Summary: Resumen sencillo para un público no especializado.

Abstract: Resumen técnico del trabajo.

Keywords: keyword 1; keyword 2; keyword 3

1. Introducción

2. Metodología: preparación del conjunto de datos

2.1. Importación de los DataFrames

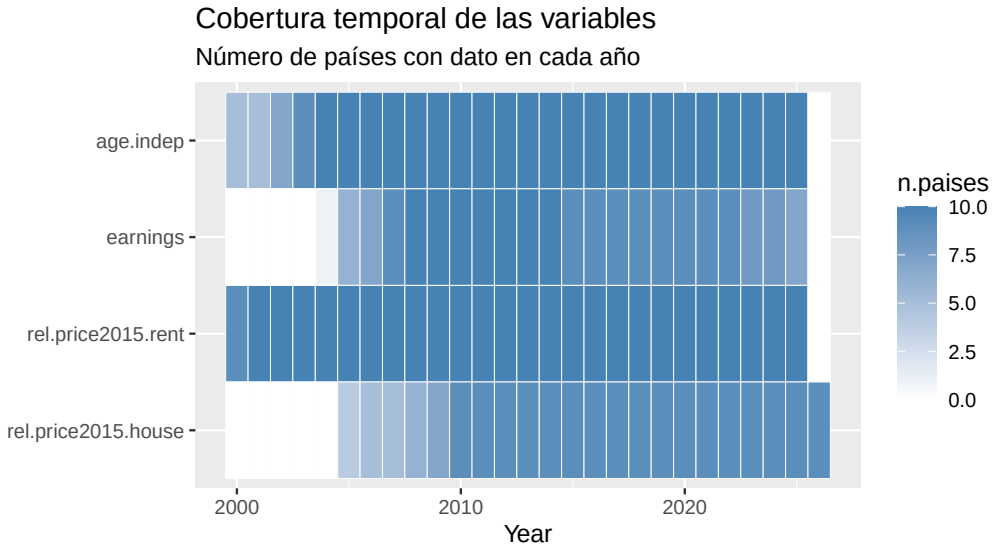

Una vez cargados todos los datos que se desea estudiar, procederemos a crear el conjunto que los engloba. A continuación exploraremos las variables que conforman este conjunto y determinaremos cuál es la mejor forma para llevar a cabo el análisis.

2.2. Exploración de variables

Empezaremos la exploración con una tabla que resume las características más importantes de todas las variables del conjunto.

Table 1. Resumen de las variables del conjunto de datos.

3. Resultados

Con el conjunto de datos preparado, procederemos a analizarlo aplicando distintos métodos para poder obtener conclusiones respecto a nuestra pregunta. En este apartado se mostraran y discutiran los resultados de dichos análisis.

3.1. Análisis univariante: estadísticos descriptivos de las variables numéricas

4. Conclusiones

Supplementary Materials: The following supporting information can be downloaded at: https://www.mdpi.com/article/10.3390/1010000/s1, Figure S1: title; Table S1: title; Video S1: title.

Author Contributions: For research articles with several authors, a short paragraph specifying their individual contributions must be provided. The following statements should be used "X.X. and Y.Y. conceive and designed the experiments; X.X. performed the experiments; X.X. and Y.Y. analyzed the data; W.W. contributed reagents/materials/analysis tools; Y.Y. wrote the paper.'' Authorship must be limited to those who have contributed substantially to the work reported.

Funding: Please add: `This research received no external funding''` orThis research was funded by NAME OF FUNDER grant number XXX.'' and and "The APC was funded by XXX''. Check carefully that the details given are accurate and use the standard spelling of funding agency names at https://search.crossref.org/funding, any errors may affect your future funding.

Institutional Review Board Statement: In this section, you should add the Institutional Review Board Statement and approval number, if relevant to your study. You might choose to exclude this statement if the study did not require ethical approval. Please note that the Editorial Office might ask you for further information. Please add "The study was conducted in accordance with the Declaration of Helsinki, and approved by the Institutional Review Board (or Ethics Committee) of NAME OF INSTITUTE (protocol code XXX and date of approval)." for studies involving humans. OR "The animal study protocol was approved by the Institutional Review Board (or Ethics Committee) of NAME OF INSTITUTE (protocol code XXX and date of approval)." for studies involving animals. OR "Ethical review and approval were waived for this study due to REASON (please provide a detailed justification)." OR "Not applicable" for studies not involving humans or animals.

Informed Consent Statement: Any research article describing a study involving humans should contain this statement. Please add `Informed consent was obtained from all subjects involved in the study.'' OR`Patient consent was waived due to REASON (please provide a detailed justifi-

cation).’ ’ OR “Not applicable’ ’ for studies not involving humans. You might also choose to exclude this statement if the study did not involve humans.

Written informed consent for publication must be obtained from participating patients who can be identified (including by the patients themselves). Please state “Written informed consent has been obtained from the patient(s) to publish this paper’ ’ if applicable.

Data Availability Statement: We encourage all authors of articles published in MDPI journals to share their research data. In this section, please provide details regarding where data supporting reported results can be found, including links to publicly archived datasets analyzed or generated during the study. Where no new data were created, or where data is unavailable due to privacy or ethical re-strictions, a statement is still required. Suggested Data Availability Statements are available in section “MDPI Research Data Policies” at https://www.mdpi.com/ethics.

Acknowledgments: All sources of funding of the study should be disclosed. Please clearly indicate grants that you have received in support of your research work. Clearly state if you received funds for covering the costs to publish in open access.

Conflicts of Interest: Declare conflicts of interest or state ‘The authors declare no conflict of interest.’ Authors must identify and declare any personal circumstances or interest that may be perceived as inappropriately influencing the representation or interpretation of reported research results. Any role of the funding sponsors in the design of the study; in the collection, analyses or interpretation of data in the writing of the manuscript, or in the decision to publish the results must be declared in this section. If there is no role, please state ‘The founding sponsors had no role in the design of the study; in the collection, analyses, or interpretation of data; in the writing of the manuscript, an in the decision to publish the results’.

Sample Availability: Samples of the compounds ..... are available from the authors.
